Preferences

Preference option may give the user the option to change the looks of the window

Will have AutoSave option which toggles the autosave feature (it will save the file every time a change is made)

Will have LoadDefault option which loads in example data to be displayed in the Window (Will delete previous data)

# Valorant Tracker

About option will open a alert (information) window  
which will give information about the program and the  
group memebers that created it
